

SE-INTRODUCTION TO PROGRAMING

SESSION-1

1. Write a short paragraph in your own words defining what a 'program' is and give one real-life example from any app you use daily (like Instagram, Zomato, or Paytm).

Ans. A **program** is a set of instructions written in a programming language that tells a computer or application how to perform a specific task. Programs are used to make applications work and provide different features to users. For example, in Instagram, a program helps users upload photos, view posts, like and comment on them, and receive notifications when someone interacts with their account.

2. List three popular programming languages you have heard of, and for each, mention whether it is usually compiled, interpreted, or can be both.

Ans.

1. **Java** – Compiled and interpreted

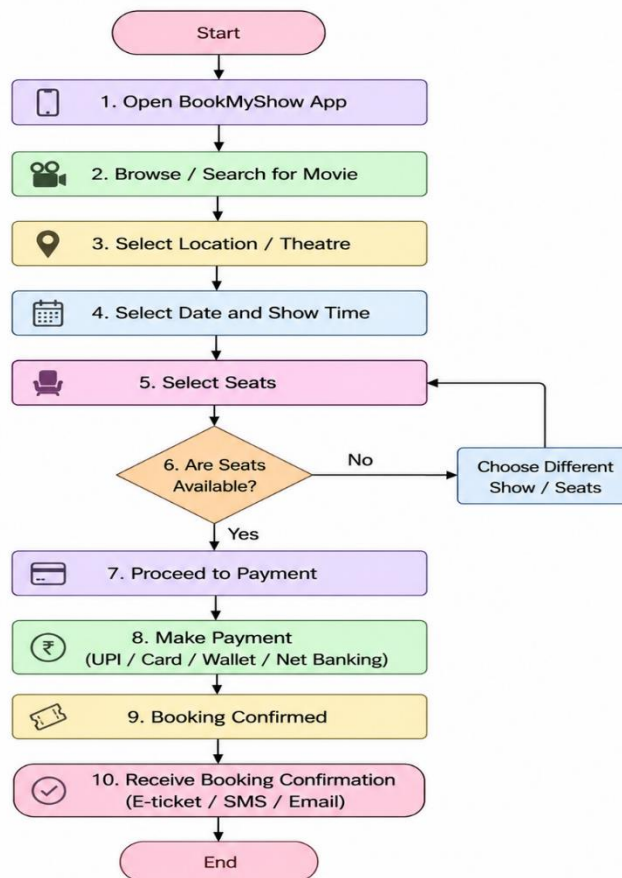

2. **Python** – Interpreted

3. **JavaScript** – Interpreted and compiled (JIT)

3. Draw a flowchart (on paper or using any online tool) for the process of booking a movie ticket on BookMyShow, starting from opening the app to receiving the booking confirmation.

Ans.

Flowchart: Booking a Movie Ticket on BookMyShow

4. Write down the steps (as an algorithm, using simple numbered instructions) for ordering food on Swiggy — from opening the app to completing payment.

Ans.

- i. Start
- ii. Open the Swiggy app.
- iii. Select or confirm the delivery location.
- iv. Search for a restaurant or food item.
- v. Select a restaurant.
- vi. Choose the desired food items.
- vii. Add the food items to the cart.
- viii. Review the order and total amount.
- ix. Confirm the delivery address.
- x. Select a payment method.
- xi. Complete the payment.
- xii. Receive the order confirmation.
- xiii. Stop
